

# Energy Efficiency.

When it comes to the spa experience, we don't believe in compromise. Each of our hot tubs meets the most stringent energy standards established by the California Energy Commission (CEC) for portable spas. From the insulation, heaters, and pumps to our custom-made covers, we'll keep your Caldera® spa hot and ready. And your energy bills low.

YOU'RE COVERED. FROM TOP TO BOTTOM.

FiberCor®

## FIBERCOR®

Our proprietary FiberCor gives you a breakthrough in insulation. The loose, wool-like fibers are applied in a two-pound density, which is four times greater than the half-pound density foam used in most spas. Completely filling the space between the spa shell and the cabinet, FiberCor fully insulates the spa, maximizing energy efficiency and keeping your operating costs low.

## ENERGYPRO® TECHNOLOGY

The EnergyPro circulation pump in our Utopia® and Paradise® Series spas saves you money by operating at a very low wattage to filter water. Heater use is reduced, because 80 percent of the energy used to operate the pump is transferred back to the water as heat.

## CUSTOM HIGH-DENSITY COVERS

We custom-build your cover to the exact measurement of your spa to ensure a tight seal for optimum energy efficiency. The durable, marine-grade vinyl cover includes child safety locks and is UL listed in compliance with ASTM standards.
